Folding Procedure

1. Complete bike in unfolded condition.

2. Open the seat post clamp and lower the seatpost to its lowest possible position.

3. Push the pedal inward to release and fold it as shown.

4. Push the safety clip and open the quick release of the foldable stem. Fold the handlebar in downward direction.

5. Disengage the safety clip and open the frame folding quick release.

6. Fold the front part of frame backwards towards the rear side.

IMPORTANT:
If you encounter difficulties, or are uncertain about anything identified in this Owner’s manual, please contact your local authorized Momentum retailer.

A WARNING
*Please do not adjust the screw in the folding quick release. This is intended for proper adjustment of the folding quick release, wrong adjustment can compromise proper functionality of the quick release mechanism*
